

Aggregating, linking, and using film metadata in novel ways

2025 – FIAF Congress Montreal

AVefi will make your collection

- ...more visible
- ...easy to find
- ...linkable
- ...quotable
- ...faster to catalog through data harvesting

by creating persistent identifiers for work, manifestation and item records

Avefi's principles of metadata management

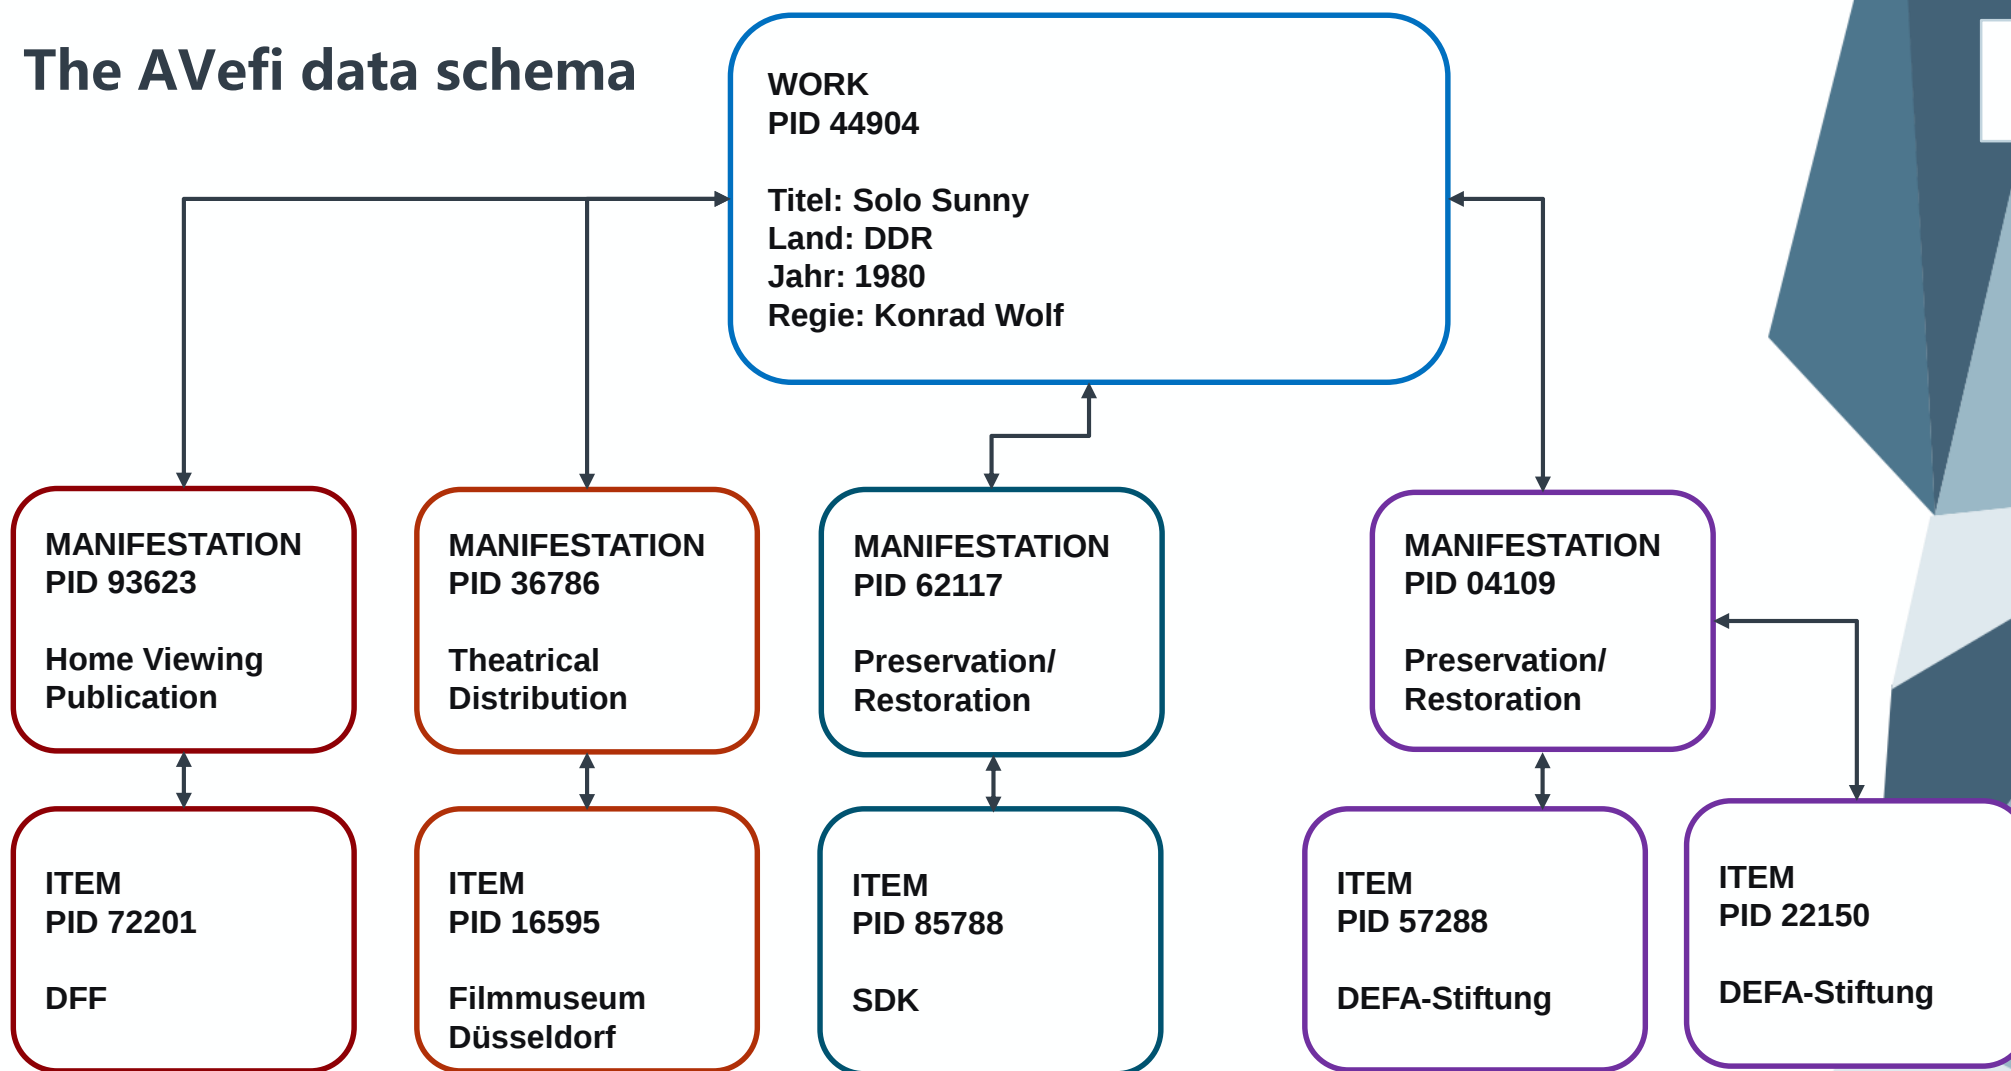

- High level of automation
- Use of standardized formats and pre-existing authority data
- Integration of other identifiers (EIDR, Filmportal UID, ISAN)
- Open Data
- FAIR (Findable, Accessible, Interoperable & Reusable)

The AVefi data schema is based on standard EN15907, the FIAF manual & FIAFCore as well as EBUCore
