ConDIDi

Full lifecycle decentralised
conference management

Today's challenges in conference management

01 | Beforehand:

- participant registration;
- ticketing;
- data protection.

02 | During the conference:

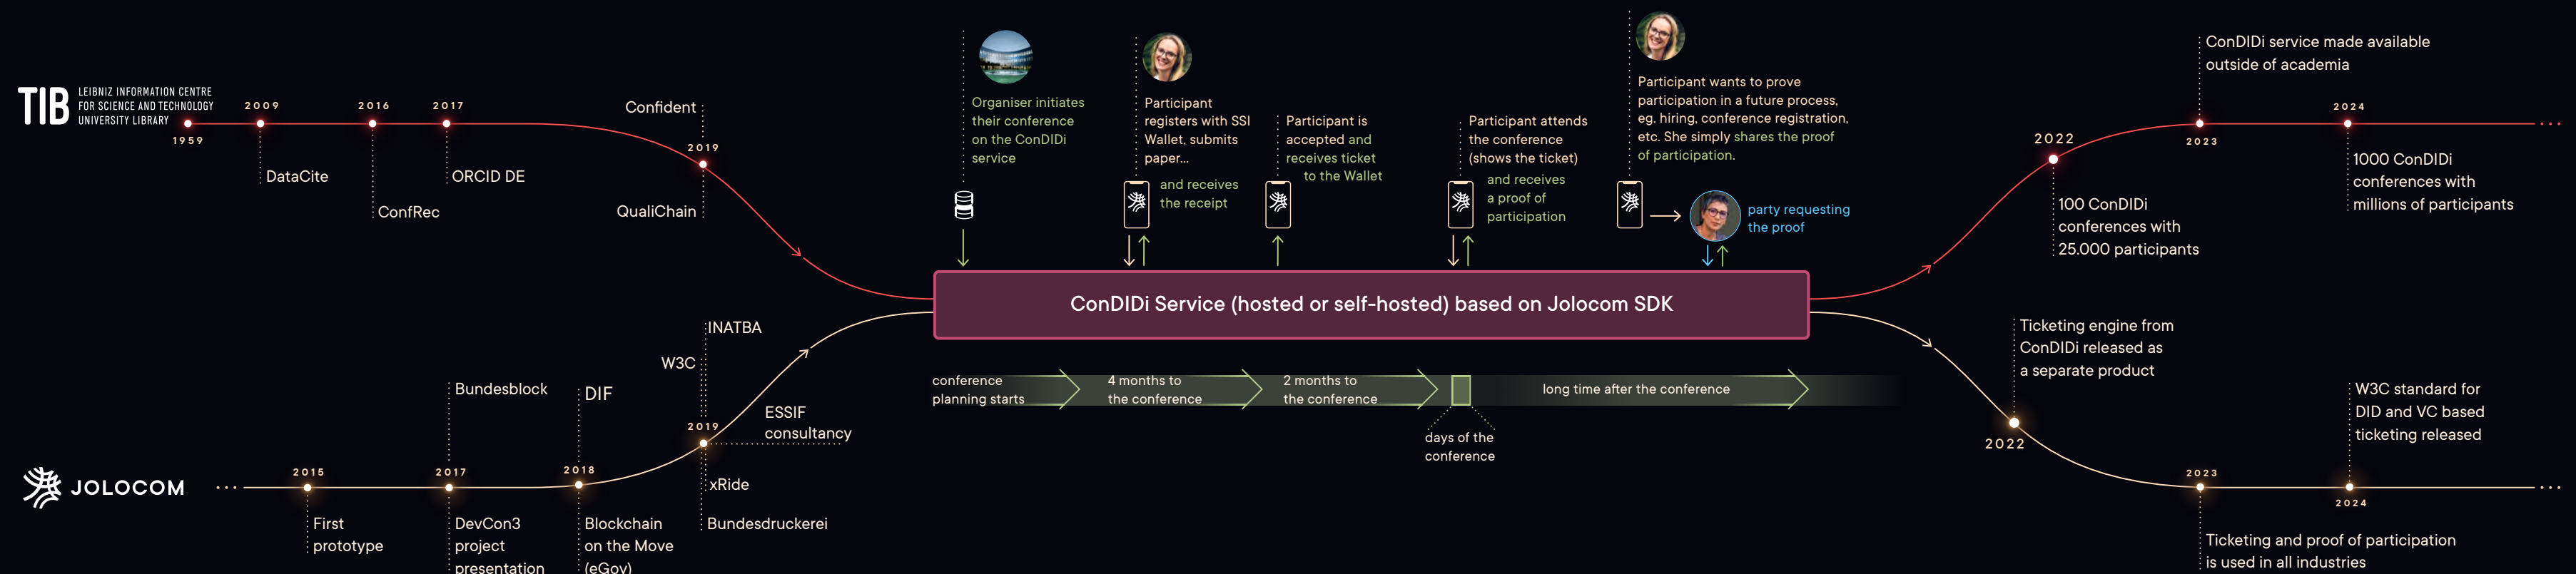

- verifying real time data for participants and organizers.

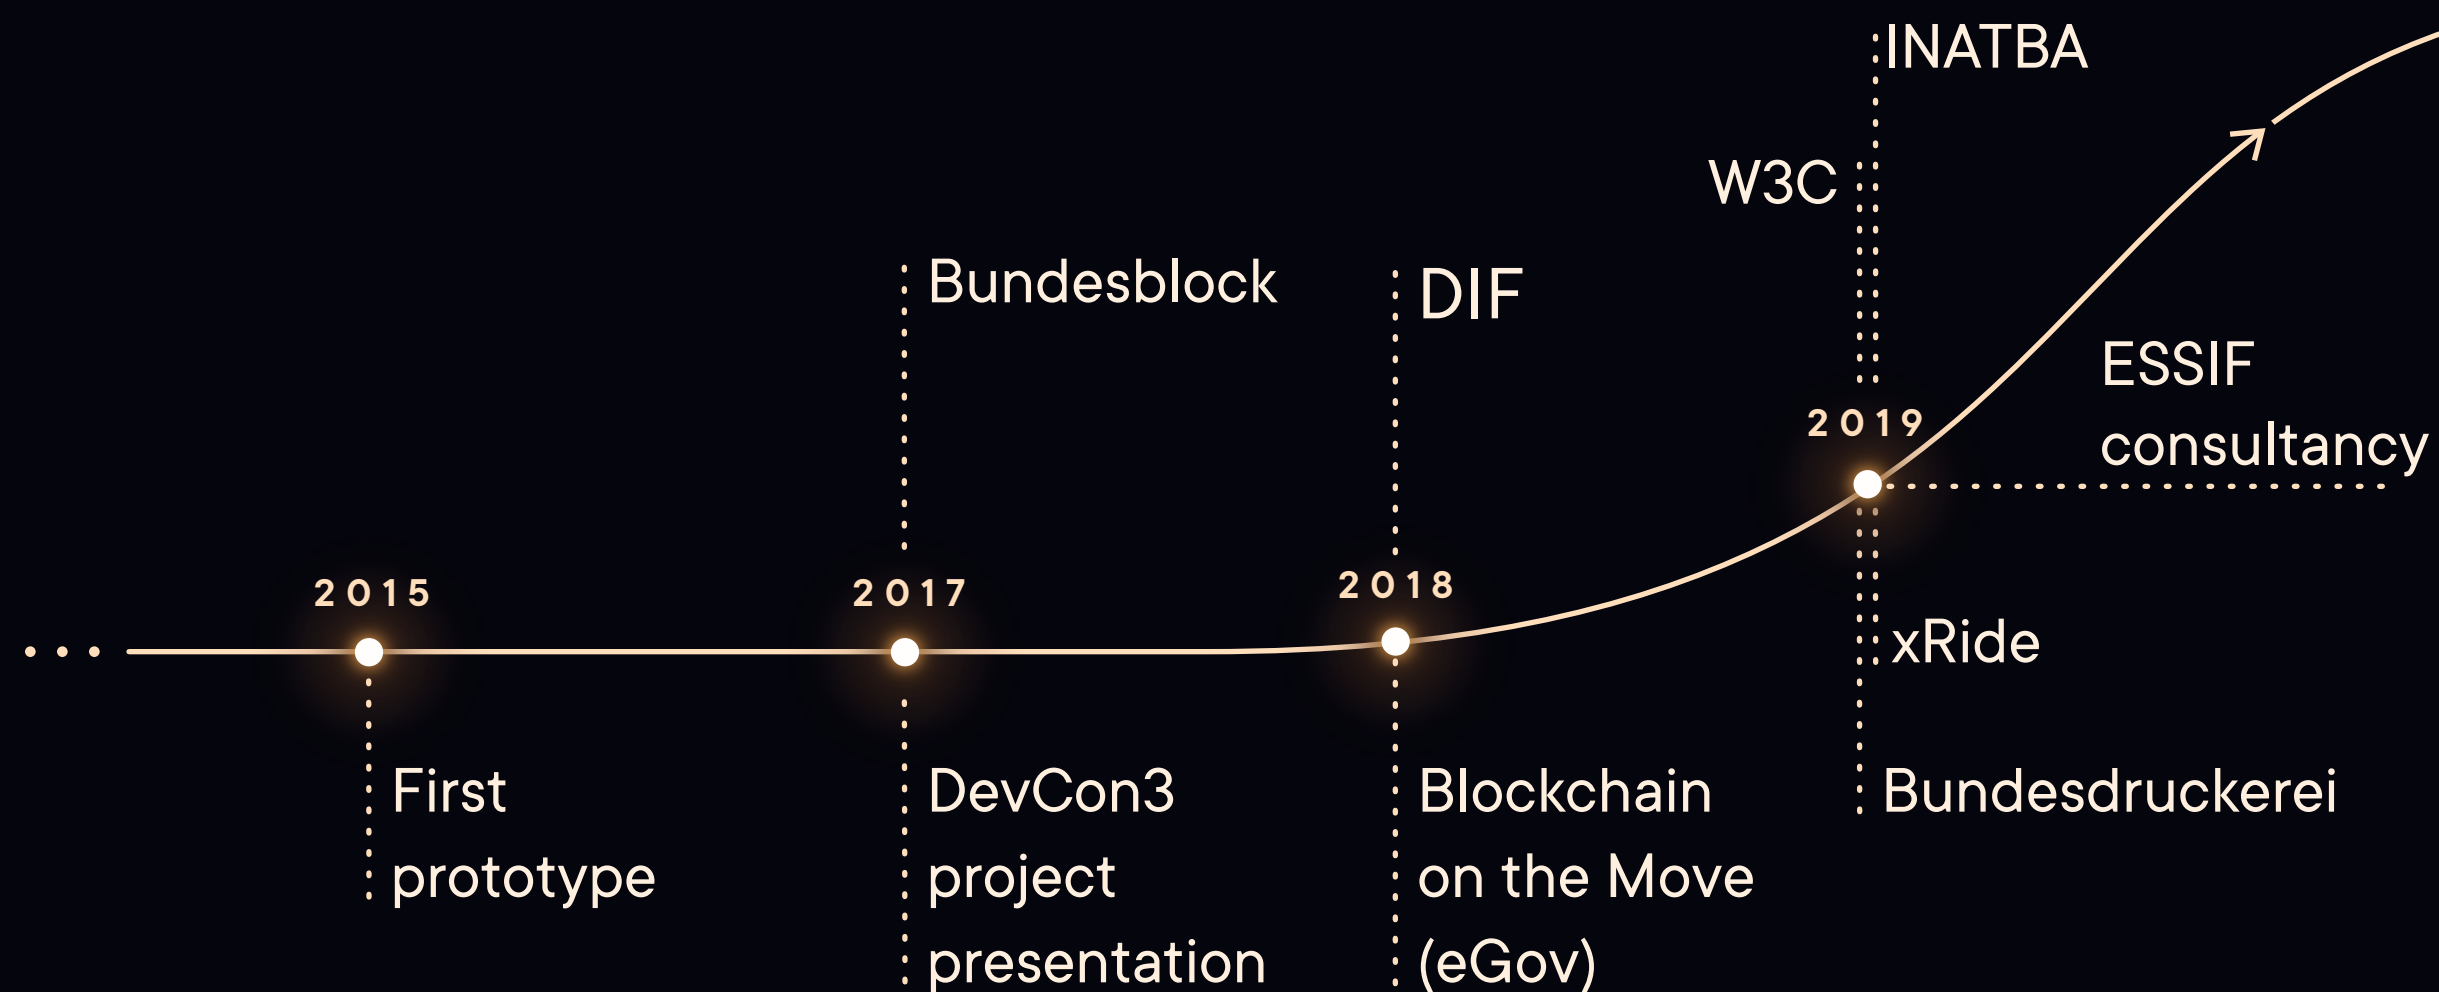

03 | Beyond the event:

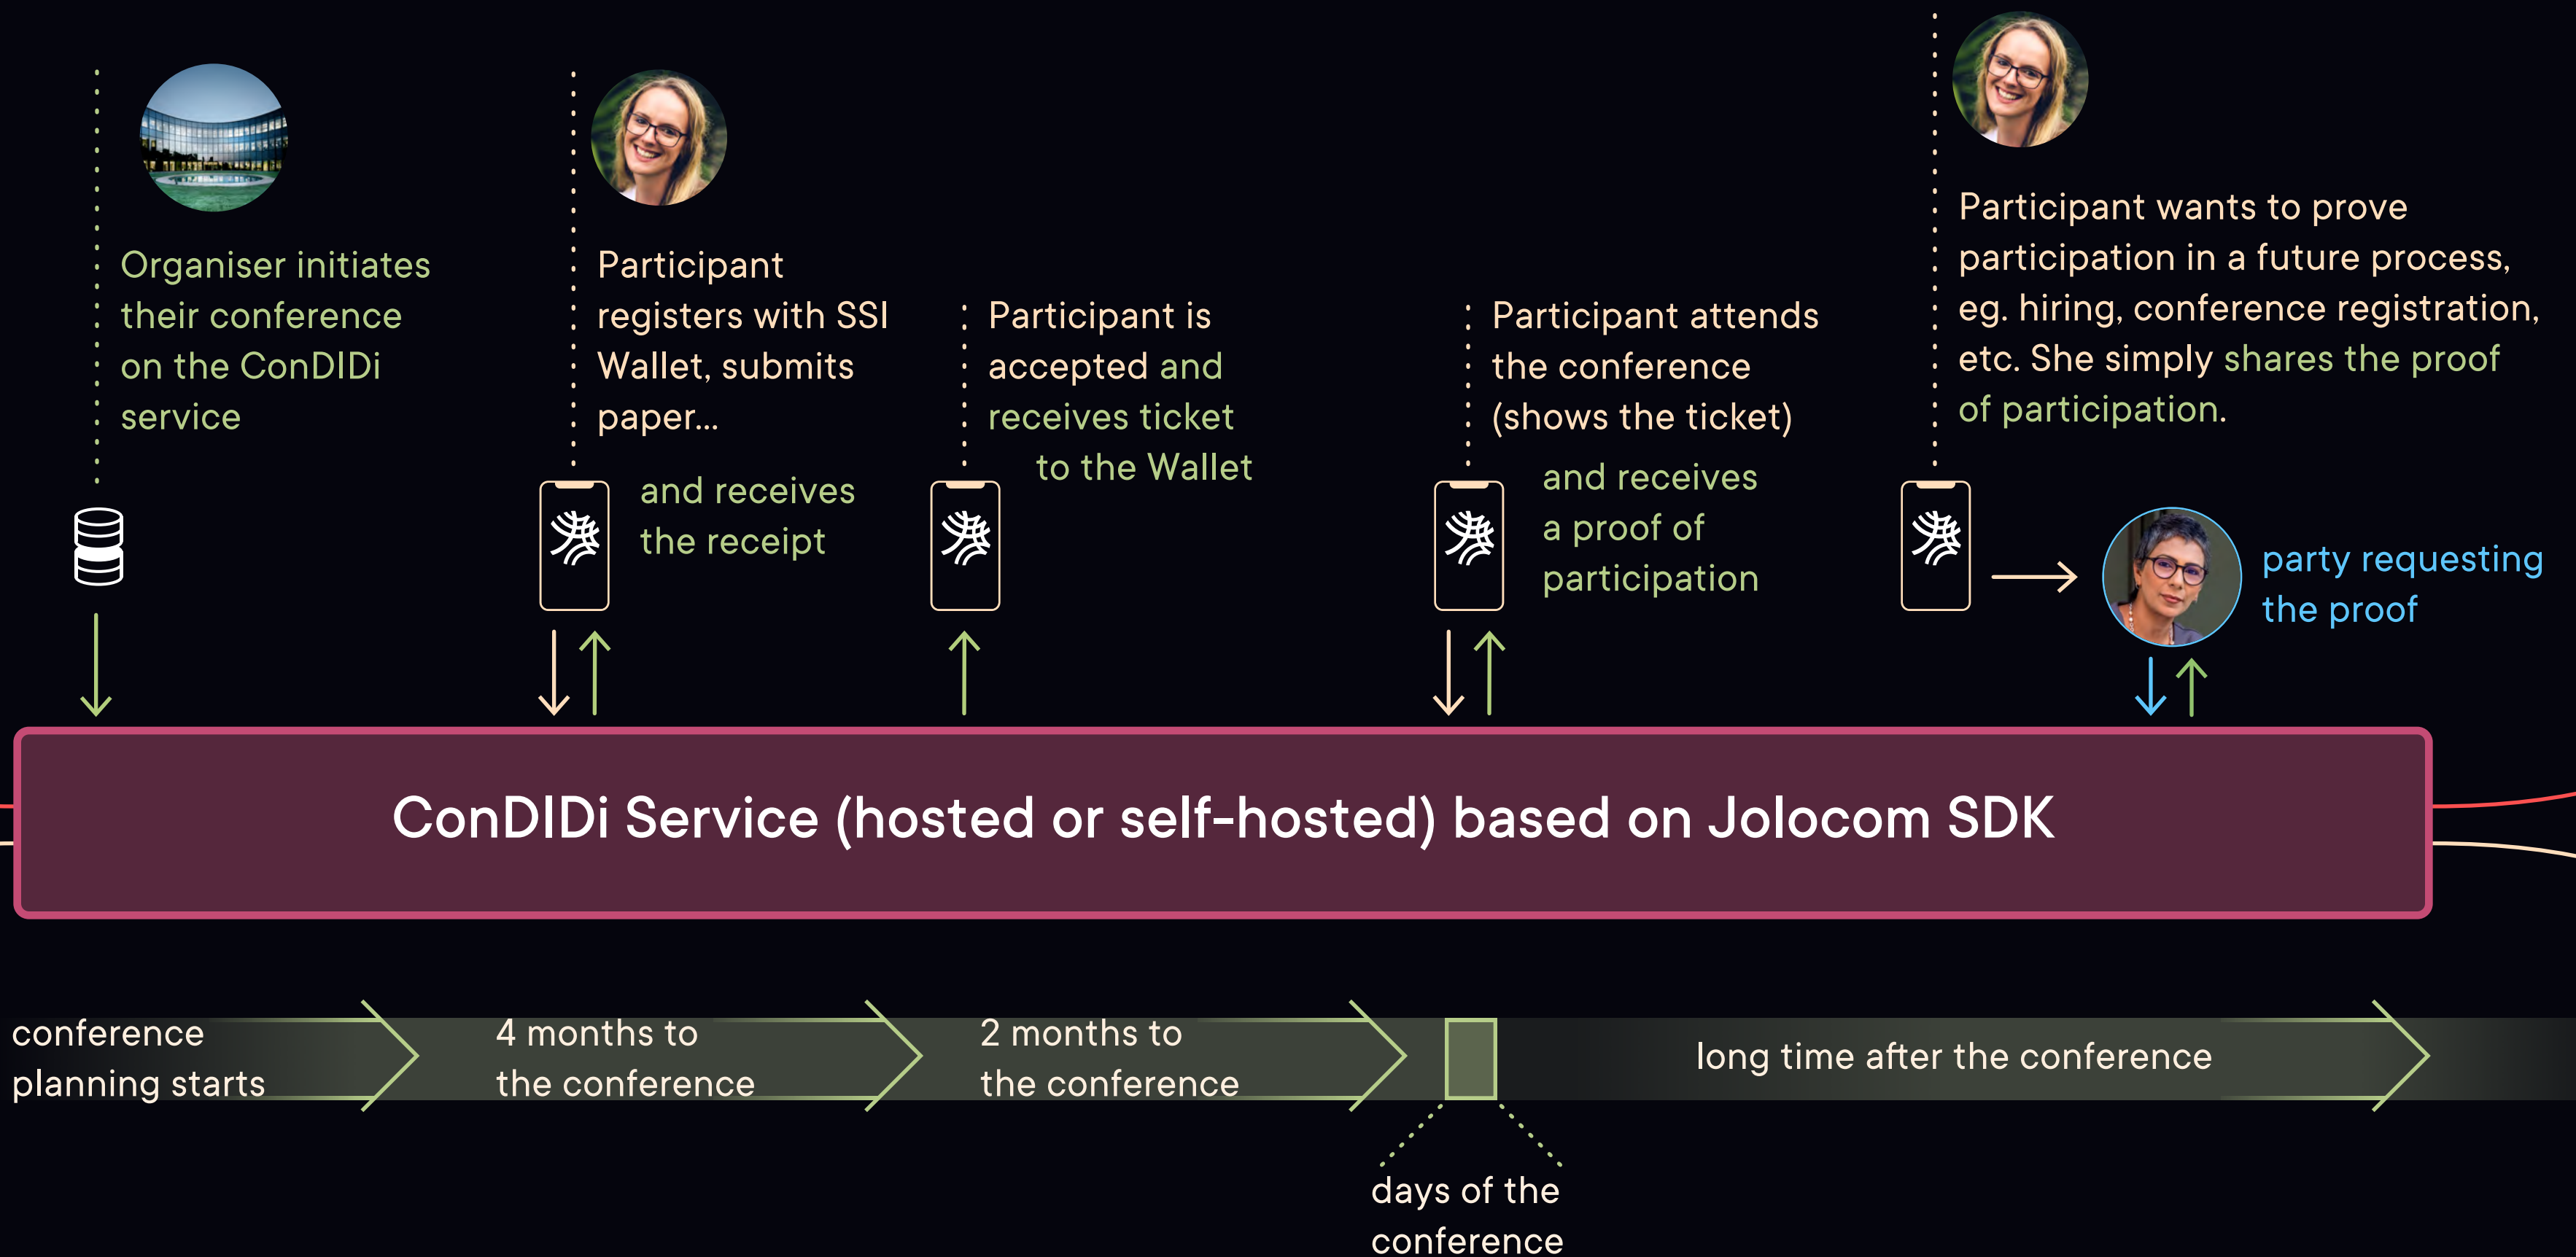

- data portability;
- reputation management;
- third party interest.

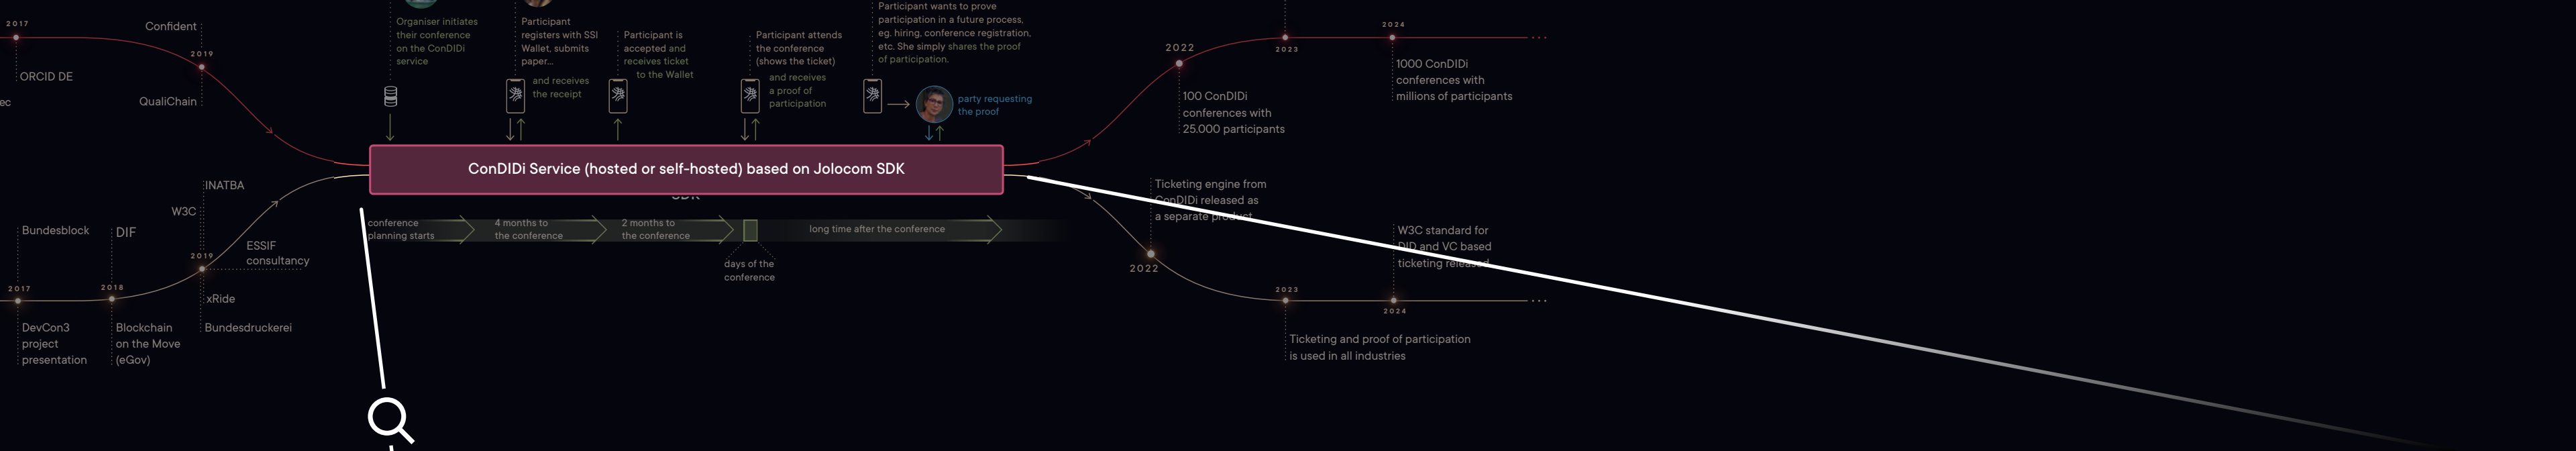

A next generation internet solution for digital sovereignty at conferences

ConDIDi Service

 Jolocom
SmartWallet

SSI Wallet

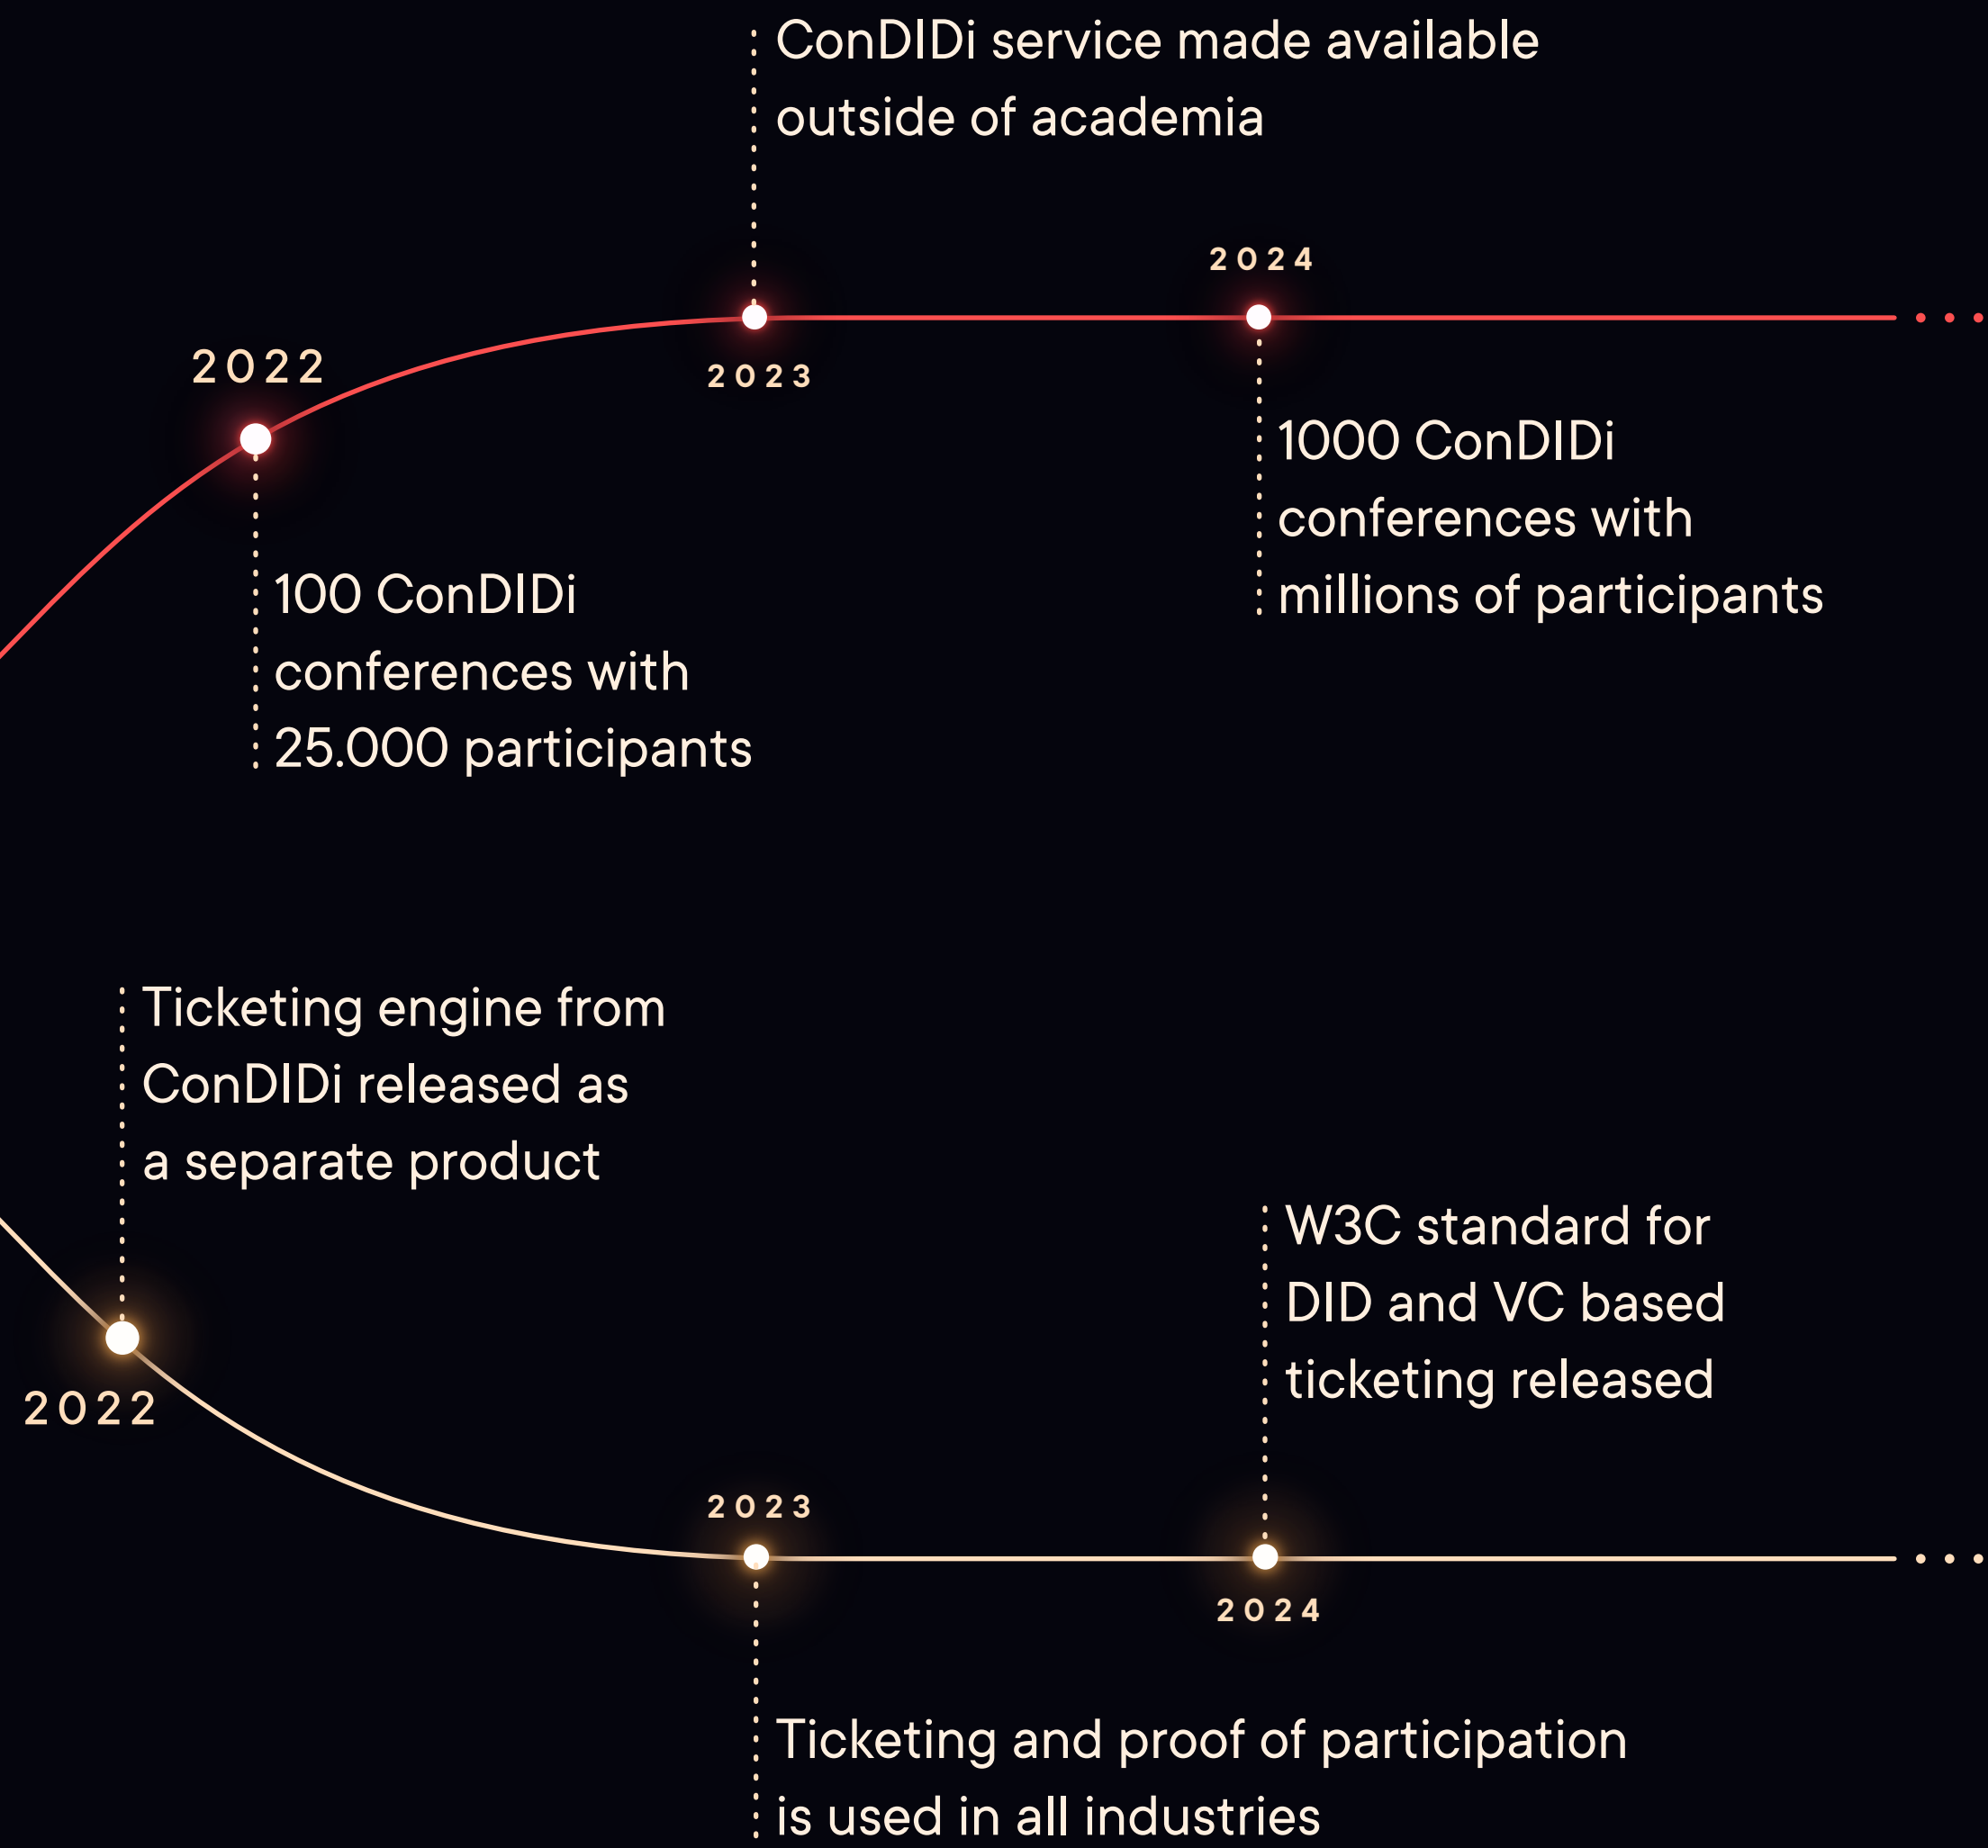

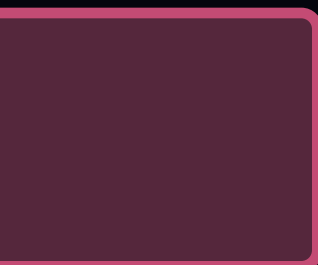

Other
Service

Jolocom SDK // open source

SSI protocol // open source // W3C compliant

Blockchain Network

Storage Layer

The conference world with ConDIDi

01 | Organizers:

- decentralized open source tool;
- largely automated participant management with built-in data protection compliance;
- independent data verification.

02 | Participants:

- full control over personal data;
- automated data verification and easy sharing.

03 | Third parties:

- verifiable data on conferences and individual participants.

Thank you!
